PROJECTS

Restaurant Menu Display

Group project in Software Design Course (Sep 2020)

- Build scalable code using fundamental OOP principles
- With the team, discuss and contribute ideas for the optimal design choice.
 - topics include: Decorators, Command Objects, Composite Objects, Abstract Classes/Interfaces, lambda expressions, etc.

Productivity Booster

Hackathon Project @ McHacks 2020

- "We all get distracted in long periods of focus, right? Let's delegate mindfulness to a bot then!"
- In Java, with the help of a face tracker, identify patterns of unproductive work periods
- Send a notification to the user to either: get working, take a break, or call it a day
